

Continents & Oceans

Continent- a large solid area of land. Earth has seven continents.

Ocean- is a large body of continuous saltwater. There are five oceans that covers over 70% of the Earth's surface.

Titanic- a huge ship that was said to be the biggest, the best and the safest ship ever to have set sail. But on 15 April 1912, five days into its very first voyage from Southampton to New York, the Titanic collided with an iceberg in the **Atlantic Ocean** and sank. There were over 2200 people on board but only 715 people survived.

The Titanic's Journey

School Comparison: Buckden v London (Hackney)

How do you get to school?
What type of building is it?
What human and physical features are nearby?
What would a day at school look like?
How would you describe the community?
